

**Q PLUS HIGH FLOW AIR BRICK AND BEZEL**

Titon's Q *Plus* High Flow Brick offers exceptional airflow performance in a unique single brick size unit, replacing conventional unsightly double air bricks twice its size. This makes it easier to fit or build around than the larger air bricks traditionally provided for whole house ventilation systems. The High Flow Brick therefore forms an integral part of the fully ducted domestic ventilation design, without compromising system performance in SAP Appendix Q.

A recent addition includes the introduction of an optional bezel to provide a neat finish when, for example, integrating the air brick in to external cladding. The bezel is available in standard finishes of white, grey or brown, other finishes are available on request.
