Espagnolette Cleaning & Maintaining

Espagnolette must be periodically inspected, cleaned and maintained to ensure continued operational performance.

Remove any debris using a soft brush, then wipe the surface of the espagnolette with a soft cloth. If necessary moisten the cloth with light oil.

DO NOT use abrasives, detergents or corrosive cleaners.

Fittings should be checked to ensure they are firmly fixed, are not damaged and are operating correctly. Any issue should be referred to a suitably competent person.

Moving slides and mushrooms should be lubricated as shown.
